

## **INCLASS**

The Habitat exhibition in Valencia, Spain, was the venue for presenting the new chair collection MAY, designed by Francesc Rife. The MAY design is characterised by its lightweight, elegant, pure and timeless forms. The metal structure of calibrated steel rod is finished in black, white, aluminium or chrome. The backrest can be upholstered or varnished wood; the upholstered version can be manufactured in any of the fabrics from their INCLASS samples catalogue. The wooden version is manufactured in beech veneer, oak or ebony, and all MAY chairs are stackable.
